BRASS TUBING

Brass and bronze tubing are frequently used in air, gas, plumbing and hobby applications. They’re also used for making radiator components, ammunition casings, and many types of hardware. Brass is soft which makes it easier to use for fabrication while Bronze is brittle although with a higher melting point and resistant to corrosion.

SKU: N/A
Categories: Brass, Tubing & Pipes

PRODUCT DESCRIPTION

Alloys:

C230 - Red Brass

C272 - Yellow Brass

C330 - Leaded Brass

C443 - Admiralty Brass

C687 - Aluminum Bronze

Specifications:

ASTM B43 / ASME SB43

ASTM B111 / ASME SB111

ASTM B135 / ASME SB135

OD Range: 0.250" -> 4.00"

Wall Thickness: 0.020" -> 0.083"

Length: Per Customer Request

Tempers:

061 (Annealed)

H80 (Hard Drawn)

H55 (Light Drawn)

Typical Applications:

Automotive

Electrical components

Machining

Refrigeration

Plumbing

Heat exchanger
